-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

The disclosure is objected to because of the following informalities: the first page of the specification should be amended to indicate the continuing status of the present application with up to date information as to the status of the parent application. The specification at pages 10 and 15 refers to fig. 3 as a view showing "contents" of a translation table when it only appears to show that a linear relationship exists between the output of latch 18 and the control signal S8.

Appropriate correction is required.

This application is in condition for allowance except for the following formal matters:

As above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Park et al. control a variable attenuator in the signal path to an amplifier by comparing latched values derived from detected input and output signals; see fig. 2. However, the reference is not applicable as prior art to the present application. Jenson uses previous and present detected output values to set a gain control signal for a variable attenuator in the signal path to an amplifier but does not utilize the input signal level as claimed. See fig. 7.
